For tolerances see description of each item. Theoretical calculations are enclosed for all of the above coatings. If not specified there, all diagrams show transmission/reflection without consideration of the rear surface. The wavelength tolerance will be $\lambda \pm 2\%$.

Discount for substrates of the same type: starting from 10 pcs 5%, starting from 20 pcs 10%, starting from 30 pcs 15%, starting from 50 pcs 20%.

Up to 10 substrates fit in one holder plus one witness sample you requested.

We deliver within about 6 weeks after an order has been placed. Customer-owned substrates need to be supplied at least 2 weeks before coating.

If you should have further questions or wishes, please contact us. We would be pleased to receive an order from you. This quotation is subject to our conditions of sale (available upon request).

Yours sincerely
Laseroptik GmbH
